Renaturalisation

A close-up photograph of a plant with large, vibrant green, heart-shaped leaves. The leaves have prominent veins and some show signs of being eaten, with small holes visible. The stems are a reddish-brown color. The background is a soft-focus view of more of the same plant.

Biodiversité

The image shows two European perch (Perche) swimming in clear, turquoise water. The larger fish is in the foreground, angled towards the right, displaying its characteristic dark vertical stripes on a lighter, silvery-green body. Its dorsal fin is prominent and spiny. A smaller, similar fish is visible behind it, also swimming in the same direction. The overall scene is bright and clear, emphasizing the natural habitat of the fish.
